Course Fees	\$950.00
Registration Deadline	7 Jul 2023

ISA Foundations of Strength and Conditioning Course

Course Synopsis

The fundamental strength and conditioning course is designed to provide a comprehensive overview of the principles and practices of strength and conditioning training for athletes and fitness enthusiasts. This course covers the foundational principles of strength and conditioning, and various methods and techniques used in strength and conditioning training, including weightlifting, plyometrics, speed and agility training. Throughout the course, students are introduced to practical skills and techniques for coaching and cueing exercises, managing athlete safety, and providing effective feedback to athletes.

Course Objectives

Upon successful completion of the course, participants will understand:

- Understand basic strength and conditioning principles
- Execute and supervise strength training and conditioning activities
- Understand the safety requirements needed for strength training and conditioning

Course Syllabus
