ISA Wellness and Behaviour Modification Course

Course Synopsis

The fundamental wellness and behaviour change course is designed to provide a comprehensive understanding of the principles and practices of promoting wellness and behavior change. This course covers the basic concepts of health and wellness, as well as the practical application of behavior change strategies to improve personal and public health. The course explores the principles of motivational interviewing and the Transtheoretical Model. In addition, the course covers the importance of nutrition, physical activity, stress management, and sleep in promoting wellness and preventing chronic diseases.

Course Objectives

Upon successful completion of the course, participants will be able to:

- Understand the basic principles of health and wellness
- Understand the different principles and theories of behaviour change
- Apply the Transtheoretical Model to overcome threats to health
