

ISA - Qinetic Rehab Exercise and Therapy Specialist Course (Level 1)

Sign up with a family/friend and enjoy special discounts!

Rehab exercise and therapy specialist addresses musculoskeletal related issues through the use of a framework of assessment, treatment and exercise prescription. Their role is to develop rehab programs and apply treatment methodologies that help manage muscle and joint related pain. This course is for anyone looking to advance their knowledge and understanding of how to approach and address musculoskeletal related pain and injury. It looks at common muscle and joint issues, posture, dysfunctional movement patterns and apply a framework of rehab exercise and therapy to address them.

Course Duration	42 hours over 6 days
Course Dates (Next Intake)	16, 17, 18, 23, 24, 25 Aug 2024
Course Fees	\$1500.00
Registration Deadline	8 Aug 2024
Continuing Education Credits (if applicable)	<ul style="list-style-type: none"> • 4.2 ACE CECs awarded upon completion
Grants Available (T&Cs apply)	<ul style="list-style-type: none"> • SkillsFuture Credits: For Singaporeans 25 years old and above with minimum 75% attendance rate • UTAP: 50% of unfunded course fees (before GST) for NTUC members with minimum 75% attendance rate, capped at \$250.00/year for members below 40 old, and \$500.00/year for members 40 years and above

ISA - QinetiC Rehab Exercise and Therapy Specialist Course (Level 1)

Course Synopsis

This course showcases how rehab exercise and therapy can address common postural issues faced by the general population. Participants will begin by learning about the human anatomy, its relationship between posture, joint-health and functional movement. The kinetic chain theory is explored in relation to posture alignment and muscle balance. This course will introduce and provide you with the starting tools for becoming a rehab exercise and therapy specialist to make you a better practitioner for pain management of muscle and joint related issues through the use of a rehab framework for assessment, treatment and exercise prescription.

Course Objectives

Upon successful completion of the course, participants will be able to:

- Understanding the importance of posture and joint mobility and methods of assessment
- Demonstrate skill in application of the rehab framework provided to apply manual therapy and exercises in addressing common postural alignment and musculoskeletal issues.
- The ability to perform manual therapy techniques
- Prescribe exercises in relation to assessment and treatment of a client
- Understand the indications/contraindication in rehab
- How to conduct a rehab session for a client
- How to create a rehab program for a client

Course Syllabus

Please refer to page 3-5 for detailed course syllabus and class schedule.

Assessment

Theory Assessment (30 MCQs) and Practical Assessment

Conducted during Day 6 of the course

Award

Upon completion of the course, each participant will be awarded
ISA - QinetiC Certificate in Rehab Exercise and Therapy Specialist (Level 1)

Venue

International Sports Academy

143 Cecil Street, GB Building, #26-01 Singapore 069542
