Registration Deadline

28 Jul 2025

Course Synopsis

This course emphasizes the techniques of deep tissue and recovery massage. Participants will learn essential concepts such as Human Anatomy and Kinesiology in order to build a strong foundation which will aid them in massage. Participants will then learn how to conduct massage techniques such as effleurage, petrissage and tapotement. Participants will also learn the indications/contraindications and the appropriate application of these approaches for various conditions. Additionally, this course provides participants with an understanding of basic medical terminology and the relationship between anatomy/physiology and the practice of sports massage. Finally, participants must complete 10 hours of a massage attachment under the supervision of the trainer.

Course Objectives

Upon successful completion of the course, participants will understand:

- Basic anatomy/physiology of the human body
- Whole body sports massage techniques
- The application of deep tissue and recovery massage techniques
- The indications/contraindications of sports massage
- How to conduct a proper set up of the massage bed and preparation of the client for the massage

Course Syllabus

Please refer to pages 3 – 4 for detailed course syllabus and class schedule.
