

2026 Kettlebell For Seniors

Prepared by Blackjacqstrength Programs 2026

This course is suitable for active seniors, current personal trainers and coaches looking to expand their skills to include kettlebell strength training in their fitness routine or training sessions. The course will equip the participants with the right knowledge and practical skills in safe kettlebell movement catered for seniors. This course aims to emphasize how the kettlebell can be a relevant training tool that has direct carry-over benefits to activities of daily living (ADL) like carrying your groceries to playing with your grandchildren. The goal is to help the Seniors be functionally independent and have a good quality of life in their later years.

- DETAILS YOU NEED TO KNOW -

Course Duration
4 hours over 1 day
10am – 2pm (w/
break)

Course Date
10 August 2026
(Sat)

Course Fees
\$240.00

 (65) 6423 0668

 223 Mountbatten Road, #03-15/16/17/18,
Singapore 398008

2026 Kettlebell For Seniors

Prepared by Blackjacqstrength Programs 2026

Who is this for and entry requirements

- Active seniors who are currently playing a sport e.g pickleball or hiking or are frequent travellers.
- Robust Seniors according to ActiveSG Clinical Frailty Scale 1- 3 (See Appendix)
- Active Aging Centers (AAC) - Robust Senior Ready Instructors by National Instructor & Coaches Association (NICA).
- Certified Personal Trainer / Coach (ACE, SSCA, CoachSG or equivalent)

Appendix:

CLINICAL FRAILTY SCALE

	1	VERY FIT	People who are robust, active, energetic and motivated. They tend to exercise regularly and are among the fittest for their age.
	2	FIT	People who have no active disease symptoms but are less fit than category 1. Often, they exercise or are very active occasionally, e.g., seasonally.
	3	MANAGING WELL	People whose medical problems are well controlled, even if occasionally symptomatic, but often are not regularly active beyond routine walking.
	4	LIVING WITH VERY MILD FRAILTY	Previously "vulnerable," this category marks early transition from complete independence. While not dependent on others for daily help, often symptoms limit activities. A common complaint is being "slowed up" and/or being tired during the day.
	5	LIVING WITH MILD FRAILTY	People who often have more evident slowing, and need help with high order instrumental activities of daily living (finances, transportation, heavy housework). Typically, mild frailty progressively impairs shopping and walking outside alone, meal preparation, medications and begins to restrict light housework.

	6	LIVING WITH MODERATE FRAILTY	People who need help with all outside activities and with keeping house. Inside, they often have problems with stairs and need help with bathing and might need minimal assistance (cuing, standby) with dressing.
	7	LIVING WITH SEVERE FRAILTY	Completely dependent for personal care, from whatever cause (physical or cognitive). Even so, they seem stable and not at high risk of dying (within ~6 months).
	8	LIVING WITH VERY SEVERE FRAILTY	Completely dependent for personal care and approaching end of life. Typically, they could not recover even from a minor illness.
	9	TERMINALLY ILL	Approaching the end of life. This category applies to people with a life expectancy <6 months, who are not otherwise living with severe frailty. (Many terminally ill people can still exercise until very close to death.)

SCORING FRAILTY IN PEOPLE WITH DEMENTIA

The degree of frailty generally corresponds to the degree of dementia. Common symptoms in mild dementia include forgetting the details of a recent event, though still remembering the event itself, repeating the same question/story and social withdrawal.

In moderate dementia, recent memory is very impaired, even though they seemingly can remember their past life events well. They can do personal care with prompting. In severe dementia, they cannot do personal care without help. In very severe dementia they are often bedfast. Many are virtually mute.

2026 Kettlebell For Seniors

Prepared by Blackjacqstrength Programs 2026

- MATERIALS YOU WILL RECEIVE -

- 2026 KETTLEBELL FOR SENIORS Notes
- **COMPLIMENTARY** 4 Kg Soft Kettlebell suitable for Seniors

Assessment A practical assessment / role play will be conducted end of course to ensure that participants are able to apply what they learnt and be provided feedback.

Award Upon completion of the course, each participant will be awarded a Certificate of Completion for ISA Kettlebell for Seniors Workshop.

- HOW TO REGISTER IN 5 EASY STEPS -

- Step 1 Access the registration form at <https://isa.edu.sg/registration/>
- Step 2 Fill up the form and complete it before the registration deadline
- Step 3 You will receive the invoice with payment details in 2-3 working days
- Step 4 Make full payment to confirm your slot
- Step 5 Wait for course materials (if any) to be sent to you on the first day of the course

REGISTRATION ENDS ON 03 AUG 2026, 1800 HRS
